SCOPE OF SERVICES

Task 1 Build GIS Database

Dudek will build an ArcGIS Geodatabase (GDB) to organize the existing GIS data the City of Indian Wells currently employs in their workflow. At this point the focus will be on the Land Use and Zoning layers, in addition to base layers such as roads and regional boundaries. Dudek assumes additional GIS layers will need to be organized as directed by the City of Indian Wells planning staff. Feature datasets will be setup to organize the layers in a consistent and comprehensible manner that will serve the Planning departments functions moving forward.

Task 2 Modify GIS Data Attributes

After the Planning department's GIS data has been organized in a GDB, Dudek will modify and reorganize the GIS data attributes as appropriate. The goal would be to make the information more intuitive and easier to update as features are modified. In addition, the attributes will be setup to efficiently symbolize the data in map documents.

Task 3 Build Map Templates

Dudek will build map templates that present the GIS data in a consistent format while adhering to the City of Indian Wells specifications. The maps will include standardized text elements, fonts and legend items that will be optimally placed to make the map easy to read. This will ensure organizations using the maps work with a consistent and clean product.

Task 4 Create Short-term Rental GIS Layer

Dudek will create a Short-term Rental GIS layer based on licenses granted by the City of Indian Wells to property owners. Dudek assumes the licenses have an APN that can be extracted to create a digital list. That list will be used.

Task 5 Riverside County Data Download

Dudek will assist the City of Indian Wells in downloading GIS data from the County of Riverside GIS Open Data Portal. Data will be organized in the GDB setup in Task 1. Dudek will work with the City's Planning staff on which layers are relevant.

Task 6 On-Call Technical Assistance and Meetings

Subsequent to completing Tasks 1 thru 5, consultant will be available on-call to provide GIS-related technical assistance, as needed, to help facilitate work products and/or assist in managing updated data and software upgrades. Consultant should assume up to 3 meetings at City Planning Department.
