INDIAN WELLS

CITY OF INDIAN WELLS PRESENTS:

INAUGURAL INDIAN WELLS PRO-AM INVITATIONAL!

First the LG Skins Game, then *Big Break Indian Wells*, and now the City of Indian Wells is pleased to unveil an exciting new golf tournament to be played on the Indian Wells Golf Resort's championship Players Course.

The first Indian Wells Pro-Am Invitational will be held on Saturday, January 31, 2015 with an 11 a.m. shotgun start. Teams will comprise one professional and four amateurs (or members of their club). Professionals play their own ball in a stroke play format, while amateurs will play a 1 best ball shamble.

The pros play for their share of the \$10,000 cash purse, eligibility for a \$2,500 skins game and, of course, the coveted title of Indian Wells Pro-Am Champion. Winning amateur teams will receive awards and prizes including golf packages to some of the top golf resorts in the nation. In addition, placing amateur

team members will receive plaques. The winning pro will receive the Champion's Trophy and his/her name added to the perpetual Invitational Cup.

The cost of \$1,200 per team includes: 18-hole play on the renowned Players Course and shared cart with GPS; use of the practice facility; an amateur tee gift package; a delicious barbecue before the tournament while players are warming up; and a festive awards reception cocktail party, complete with music, hosted wine tasting, and hors d'oeuvres. There will also be hole-in-one prizes on each par 3, as well as closest-to-the-pin prizes and long-drive prizes for amateur players.

There is only space remaining for seven teams, so sign up soon! Visit www.indianwells golfresort.com (Groups/Indian Wells Pro-Am) for more information. To register, contact Joe Valdivia at jvaldivia@iwgr.com, (760) 848-8044.

DID YOU NOTICE?

Did anyone notice the 34,000-pound fire truck, with the siren wailing, barreling down Fred Waring Drive responding to an emergency call? How about the 5,000-pound Indian Wells police car weaving in and out of traffic also responding with the fire engine? With a cell phone in one hand, a lipstick tube in the other, and a breakfast burrito in the third, noticing emergency vehicles in your rearview mirror growing larger and larger is, sadly, a low priority for drivers.

Section 21806 of the California Vehicle Code states that any driver, upon seeing and hearing an emergency vehicle responding "Code 3" (lights and sirens) shall yield the right-of-way and pull over to the right hand edge of the roadway, remaining stopped until the emergency vehicle has passed. Emergency personnel don't need people driving over curbs, damaging their vehicles to get out of the way, or hitting street signs in a rush. The fix all emergency personnel hope for when driving "Code 3" to an emergency call is for EVERY driver to merely put on his/her right turn blinker, slow down, and pull to the right edge of the roadway.

Flocked trees must also be cut into four-foot lengths and placed next to trash containers but, unfortunately, cannot be recycled and will be sent to the landfill.

Asian Citrus Psyllid a Huge Threat to Fruit Trees

The Asian citrus psyllid has been detected in Southern and Central California. This small insect feeds on the leaves and stems of citrus trees and can transmit a deadly disease known as Huanglongbing (HLB), or citrus greening disease. It's not harmful to humans, but can be fatal for citrus. Here's what you can do to protect your citrus trees:

- **Don't move citrus** – Do not move citrus plants, plant material or fruit in or out of quarantine areas, or across state or international borders.

- **Inspect your citrus trees monthly**, and whenever watering, spraying, pruning or tending trees, look for signs of HLB and the psyllid.
- **Plant responsibly** – Plant trees from reputable, licensed California nurseries.
- **Talk to your local nursery** – Ask about products that are available to help stop the Asian citrus psyllid.
- **Graft with care** – Use only registered budwood that comes with source documentation.
- **Cooperate** with agriculture officials on detection and suppression efforts of the Asian citrus psyllid and HLB.

For complete details about the Asian citrus psyllid and HBL, and more information on prevention, visit www.californiacitrusthreat.org.

Tips for Recycling Electronics

If you received a new iPad, PDA, cell phone or television this past holiday season, you're probably wondering what to do with electronic gadgets you no longer use or that no longer work.

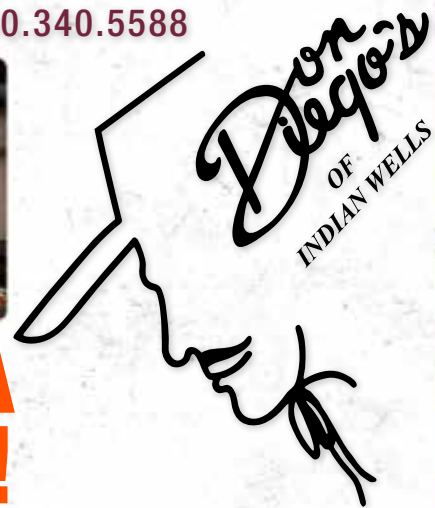

Here are some important tips that will help you dispose of e-waste and also protect the environment. You can also learn more about recycling electronics at www.electronicstakeback.com.

- **Don't Trash Old Electronics:** It's illegal to toss electronic items and batteries in the trash. These products contain toxic chemicals like cadmium, lead and mercury, which can seep into landfills and groundwater. Plus, many items contain metals and other components that can be reused.
- **Donate for Reuse:** If the item still works, consider donating it to a local school or nonprofit organization. Check out sites like www.cellphonesforsoldiers.com and www.donationtown.org.
- **Recycle:** If your product no longer works, please recycle it through a reputable agency. Burrtec Waste and Recycling will pick up your electronics for free and recycle them. These items include televisions, phones, computers, printers, monitors, modems, small appliances, radios, music players, DVR/DVD players, power tools and anything that has an electrical plug or operates by battery. Call Burrtec at (760) 340-2113 to arrange a pick up.

We Live Here! We Work Here! We Sell Here!

Bob O'Connor

“Our daughter Tricia kept encouraging us to go solar and do our small part for the environment... Our small part turned out to be big savings for us.”

I got several estimates and ended up choosing Renova Solar because they were local, very professional and their focus was on making sure I understood solar and all my options, not just ‘selling’ me. During the installation I was even more impressed - the crew was great- they came when they said they would, were really neat, and even though you can barely see it, they painted the conduit to match my house. Renova’s follow up after the installation was terrific as well – I was quickly granted Permission to Operate while some of my friends who had solar installed before mine by another company were still waiting for their systems to be turned on.

Our bills in the summer used to be as high as \$900. Now I have a flat payment every month for just \$380. It didn’t cost me anything to go solar and we’re saving thousands each year. Solar is really a no brainer - I wish I had listened to my daughter sooner!
