b e t t e r t h a n w e e v e r h a v e!”

How does fiber broadband impact communities?

The Fiber network is 100% fiber from our central office to a customer's home

Households can connect to multiple devices at once without worries

High - speed internet: Frontier[®] FiberOptic offers speeds up to 2 Gig

Fiber broadband increases perceived rental & property value*

Revitalizing rural and urban communities

Entrepreneurs have the speed they need for infrastructure

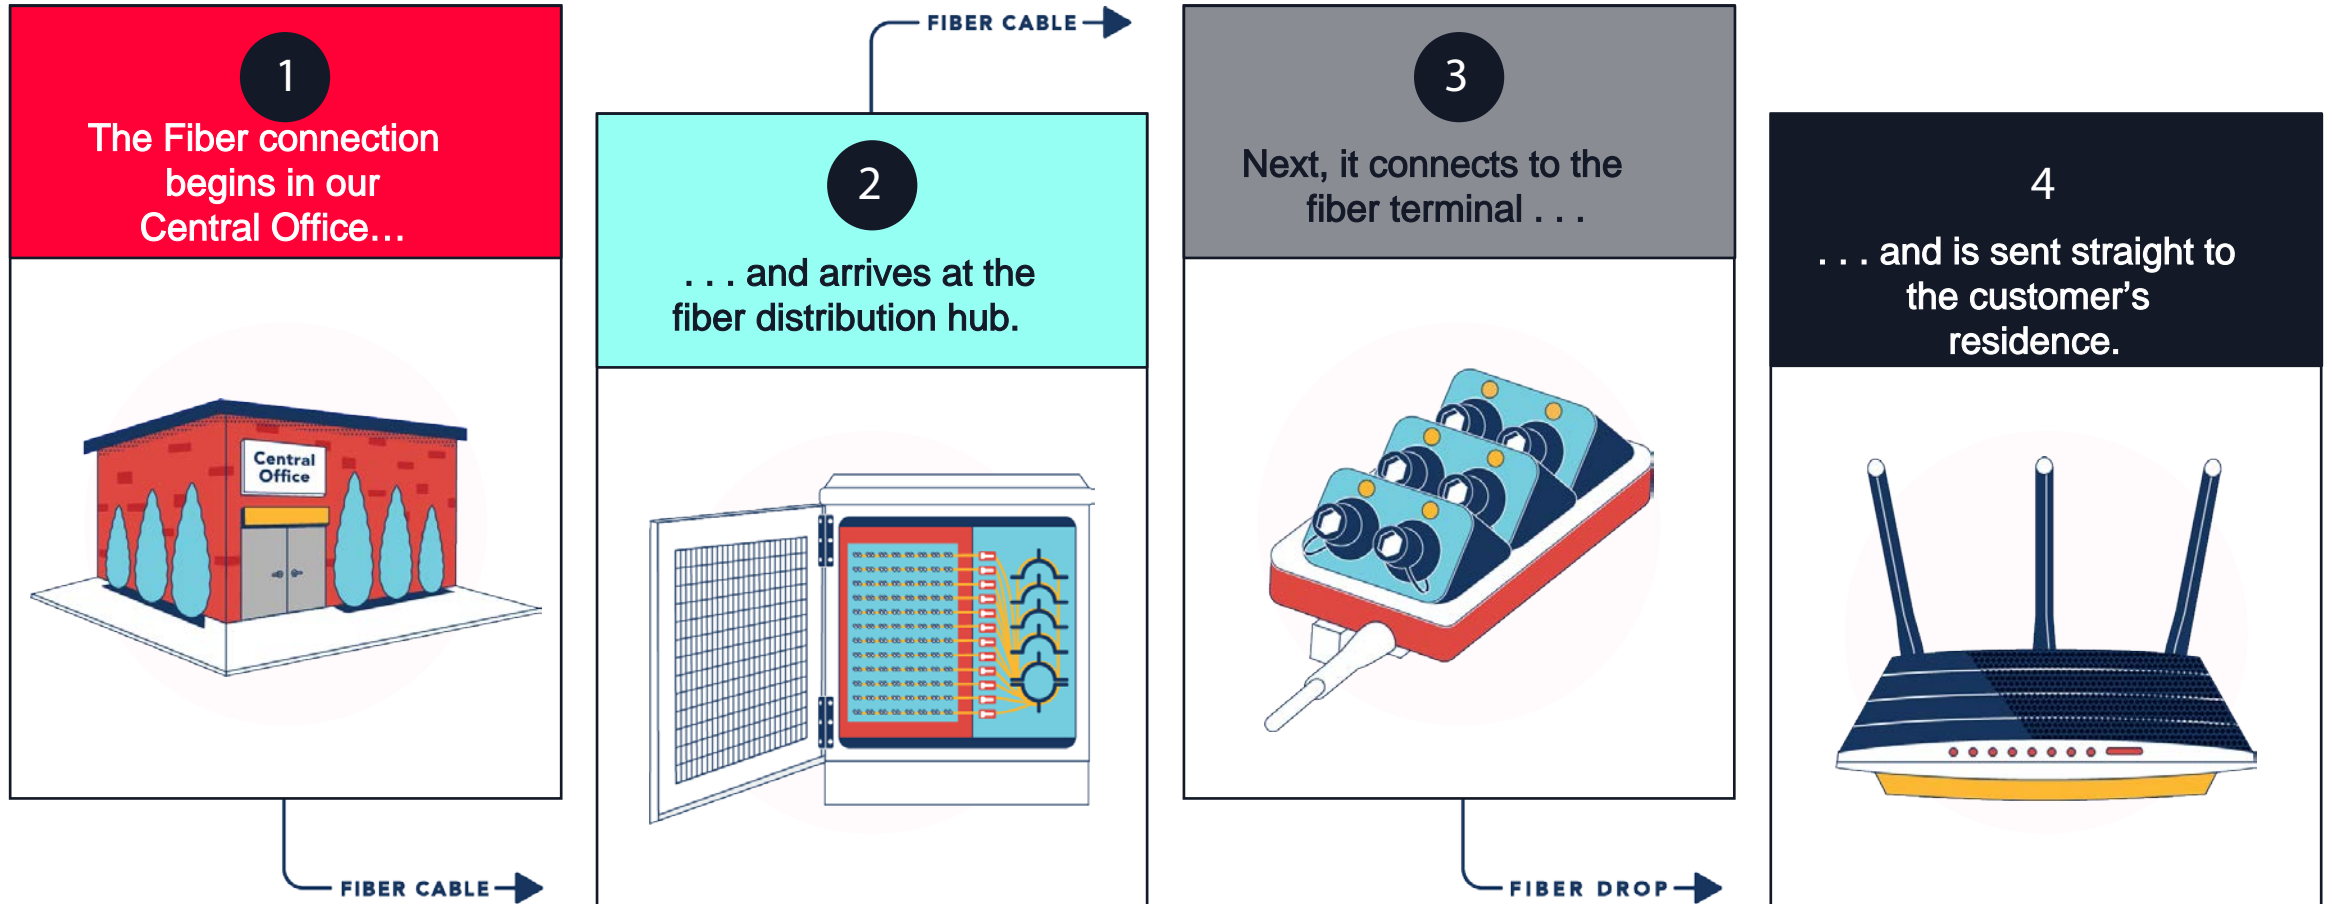

Students can learn anywhere & compete fairly

New markets for operators: enable them to offer new services

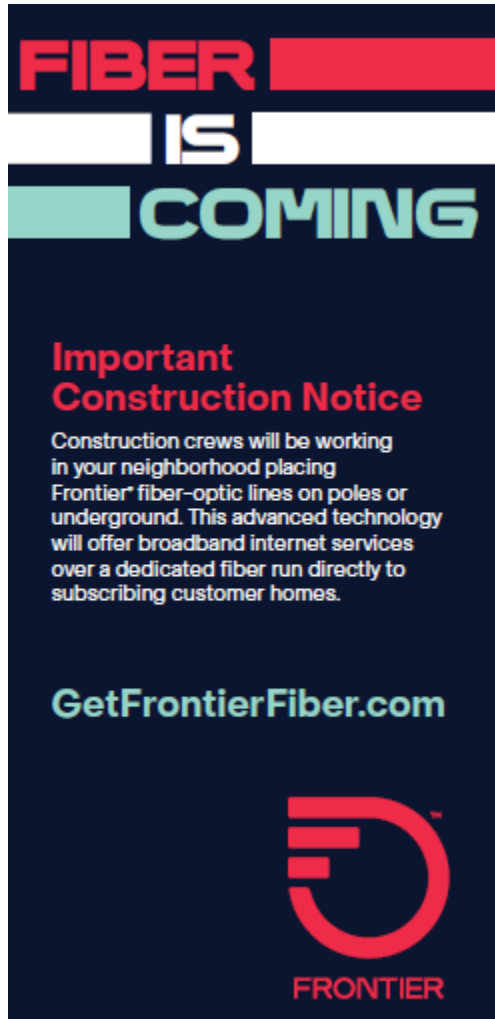

**A Fiber Broadband Association study shows home values increase with access to fiber.*

How Frontier's 100% Fiber Network reaches you

Communicate!

FIBER IS COMING

Important Construction Notice

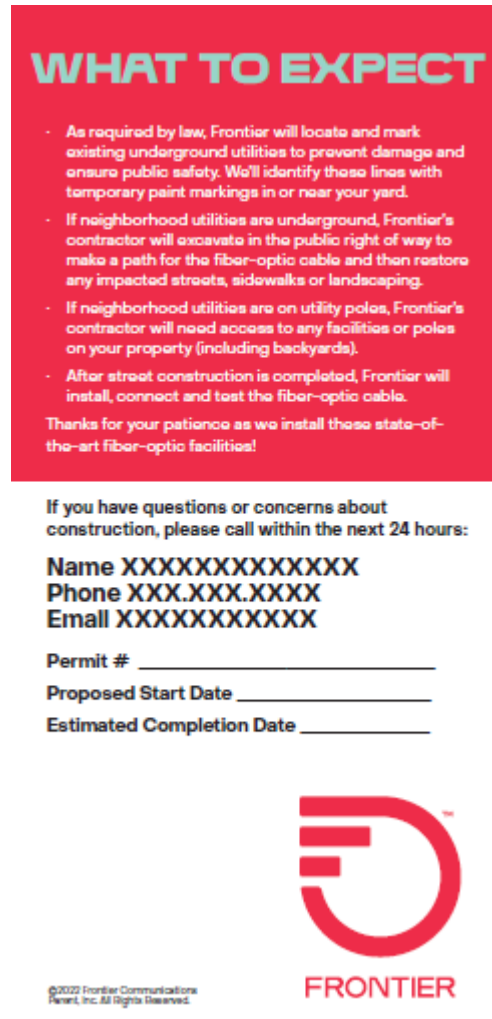

Construction crews will be working in your neighborhood placing Frontier fiber-optic lines on poles or underground. This advanced technology will offer broadband internet services over a dedicated fiber run directly to subscribing customer homes.

Construction Door Hanger

WHAT TO EXPECT

- As required by law, Frontier will locate and mark existing underground utilities to prevent damage and ensure public safety. We'll identify these lines with temporary paint markings in or near your yard.
- If neighborhood utilities are underground, Frontier's contractor will excavate in the public right of way to make a path for the fiber-optic cable and then restore any impacted streets, sidewalks or landscaping.
- If neighborhood utilities are on utility poles, Frontier's contractor will need access to any facilities or poles on your property (including backyards).
- After street construction is completed, Frontier will install, connect and test the fiber-optic cable.

Thanks for your patience as we install these state-of-the-art fiber-optic facilities!

If you have questions or concerns about construction, please call within the next 24 hours:

Indian Wells Fiber to the Home Build

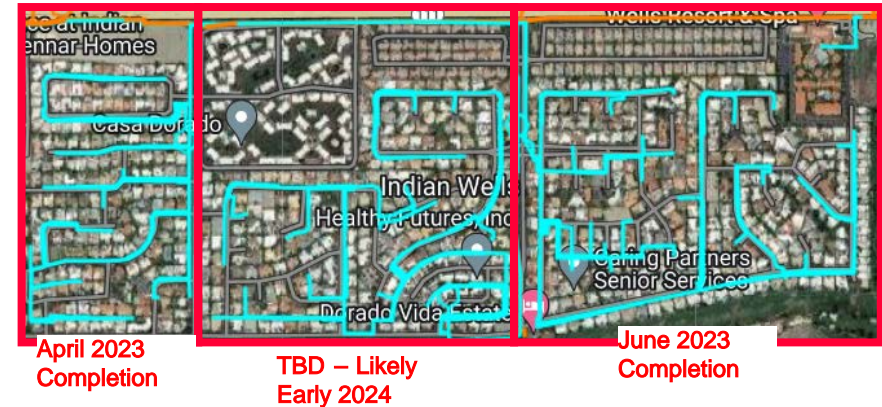

Pink Polygon = Indian Wells City Boundary

Orange Lines = Existing Fiber

Blue Lines = New Fiber Build

Key Facts

- The build area shown consists of approximately 703 addresses to have fiber built to.
- The build within the neighborhoods requires 100% new buried fiber placement due to Frontier not having any aerial assets or existing conduit to utilize.
 - New fiber must be placed via bore or micro trench.
- Residential areas with no existing or fiber planned build are private HOAs and can be added to the build as HOA agreements are secured.
 - Frontier actively seeks approval from private HOAs.

A network that's future proof
