

Remodeling?

*Being “green” may save
you some green!*

Even the smallest remodel job can produce a significant amount of waste. Please consider reusing, donating or recycling the materials left over from your project. Fixtures, cabinets, flooring and other items can often be used by others. Charitable organizations and thrift shops can benefit from your generous donation. If the material is not suitable for donation, it may be recyclable. Wood, tile, and concrete, among other construction materials, are usually accepted by local recyclers at a fraction of the disposal charge imposed by the landfill or transfer station. So being “green” may save you some green! For free guidance and information, please call the Indian Wells Recycling Coordinator at (760) 674-1040.
